# Firefox - View PDF in Adobe Reader

If you have problems viewing a PDF in the Adobe Reader DC, you will need to

- have Adobe Reader installed on your computer, and
- configure Firefox to open all PDF files in Adobe Reader instead of the browser window.

Adobe Acrobat Reader DC Download

1) Open Firefox.

2) Click on Tools >> Options >> Applications

3) Scroll down the list of applications and find all that are "Adobe".

4) Click the arrow to the right and select the "Use Adobe Acrobat DC (default) - Your machine may say Adobe Reader – if so set it to be the default.

5) Then scroll down to the Portable Document Format (PDF) and make sure it is also set to use Adobe by default.
