<b>26 credits total</b>	

**DAP**

The Distinguished Achievement Program (DAP) recognizes students who demonstrate levels of performance equivalent to college students or work done by professionals in the arts, sciences, business, industry, or in community service. To qualify for the DAP, students must meet the requirements of the Recommended Program. Also, the 4<sup>th</sup> math credit must be a course in which Algebra II is a prerequisite. If completing the DAP, IPC will not count as a science credit. A student must also have an additional year of a foreign language (total of 3 credits in the same language). In addition, students must complete any combination of four of the following advanced measures. Advanced measures include:

- independent research or project completion (limit of 2)\*
- a score of 3 or higher on an Advanced Placement (AP) test (no limit)
- a grade of B or higher in a college course (no limit)
- a grade of B or higher in a Tech Prep course (no limit)

During your Junior year, if you qualify as either a National Merit Scholar or a Commended Scholar, it will fulfill one of the four measures.
