Earth and Environmental Sciences

Biomes and Ecosystems from A Research Guide for Students:

www.aresearchguide.com/biomes.html

A mega-site covering alpine, aquatic, desert, grassland, rainforest, tundra biomes, and more.

Biomes and ecosystems from Multnomah County Library Homework Center:

www.multcolib.org/Homework/scihc.html#biomes

A mega-site full of general links on biomes as well as links specific to particular biomes.

Biomes: An Introduction: www.runet.edu/~swoodwar/CLASSES/GEOG235/biomes/intro.html

For grades 5-9

Biomes of the World: www.ups.edu/biology/museum/worldbiomes.html

This site discusses each biome in terms of its climate, soil, vegetation, diversity, plant and animal adaptations and effect of humans. For grades 5 on up.

The World's **Biomes**: <http://www.ucmp.berkeley.edu/glossary/gloss5/biome/>

An easily navigatable site introducing the importance of biomes and a description of aquatic, desert, forest, grassland, and tundra biomes. For grades 5 on up.

Global Climate Change Exploratorium: www.exploratorium.edu/climate/index.html

Middle School, High School, and College

Global Warming Kid's Site: <http://www.epa.gov/globalwarming/kids/index.html>

From the U.S. Environmental Protection Agency, a site that explains global warming and climate change through words, animation and games. For elementary and middle schoolers.

National Geographic WildWorld, a **biome** site: <http://www.nationalgeographic.com/wildworld/>

Choose a map, click on an area, and find out about its habitat.

National grasslands in Texas: <http://www.fs.fed.us/r8/texas/>

High plains http://www.blm.gov/education/high_plains/article.html
