Safety and Security

Parents are always in control of when and how their child utilizes their device. iPads must be charged each night for access the following day. Devices should be charged in a common area to monitor if in use.

There are parental controls on the iPads under settings.

Student iPads will be filtered for inappropriate content both inside the District and outside the District through a top-tier internet content filter. Parents have access to check their child's device to ensure that the filtering system is active at

http: //www.lisd.net/block.

Once students receive their iPads, LHSK will help them to load the educational apps they'll need throughout the year. Teachers might request additional apps specific to their class. Most, if not all apps will be free.

Common Sense Media is a good source for parents in search of "best apps and games".

You may provide your own case if they meet specifications found on the 1:X website.

The Digital Learner

LHS Killough is very excited to be able to offer iPads to all of our students. The 1:X model allows students to use the right device to access, create, share and collaborate. This implementation will provide each student with the appropriate device for understanding content. This may mean an iPad, SmartBoard, or laptop. Research shows tools such as iPads empower students to learn through increasing achievement and engagement.
