Student Academic Achievement	5
School Processes & Programs.....	7
Perceptions	8
Priority Problem Statements	9
Comprehensive Needs Assessment Data Documentation	12
Goals	16
Goal 1: Student Learning - Profound learning for students occurs when we provide meaningful and relevant educational opportunities. In LISD, we are preparing the dreamers to be the doers by developing engaged, collaborative learners who are equipped for success.....	16
Goal 2: Student Experience - A thriving student experience comes from an environment that engages and connects students to each other and with staff. In LISD, we know that students thrive when they are engaged in their learning and feel a sense of belonging in our schools. When students are provided enriching opportunities outside the classroom, they will find success not only in school but in their lives beyond our hallways.	27
Goal 3: Resource Stewardship - In LISD, when we say we want to be good stewards of our resources, we aren't just talking about taxpayer dollars. Resource stewardship is about three things: our time, talent and treasure. We will strike a positive work/life balance with our time, nurture our talents as educators through meaningful professional learning, and manage our treasure in a fiscally responsible way while still meeting student needs.	38
Goal 4: Community Engagement - We believe education is a shared responsibility between our district and the communities we serve. Community engagement is critical to the success of LISD. Through intentional strategic partnerships at the campus and district level, we can tap into the deep well of community support for LISD to forge stronger bonds with our stakeholders and develop relationships to benefit schools, local businesses and the community.	34
Goal 5: Student Achievement/Safeguards	40
Goal 6: State and Federal Mandates	43
