

Teaching Language to Computers: Summer Camp for Computational Linguistics

What is it?

The camp provides local high school students with an introduction to the field of computational linguistics regardless of their technical background. No coding skills are required.

What will I learn?

Each day will focus on a topic in the field of computational linguistics, including the first day, which will focus on learning to code in Python. Other topics will include natural language processing, machine learning, neural networks, and how these concepts relate to the study of language.

What are the details?

Date and Times: June 5-9, 2023 from 9am to 3pm each day

Location: UNT at Frisco Landing, 12995 Preston Rd, Frisco, TX 75033

Ages: Participants must be rising 9th graders through High School Seniors

Cost: \$350 for the 5-day camp (food is not included)
