

## Math SAT/ACT Course

Instructor: Dr. Albert Fung  
Ph.D. from Columbia University, New York

After this course, students will learn how to do well in SAT/ACT. This course motivates them to achieve higher test scores, and better grades for in-school courses. Real life examples are used to show the relevance of Math.

SAT/ACT score is the most objective criteria in university admission. 6-8 hours of study is associated with 90-point score increase in SAT, with similar gain for ACT. Compared to self-study, this course provides motivation, expert guidance, and structured curriculum.

Seats are limited. First come, first served. Please bookmark our web site to check our future course dates and locations.
