

COMMITTED TO EXCELLENCE

DATE: February 28, 2013

TO: Patricia Cheatham, Principal

SUBJECT: Vickery ES - IAQ - Cafeteria, Teacher's Lounge, Principal's office & Library
(reading area)

This morning, I was called by Shawn Barr, about IAQ concerns in the Cafeteria (stage area), Teacher's lounge, Library (reading area) and your office. I understand that some time ago, a hot water heater broke, and flooded those areas. As we visited and looked at those areas, I agreed that we needed to do Air Tests in those areas. I have put in a Purchase Order request for Southwest GeoScience to do Air Tests in those areas. Southwest GeoScience should be able to do those tests next week. As I told you, we need to have the temperature to be above 65 degrees to have a viable test.

If you have any questions, please call me.

Thanks,

Paul
