

COMMITTED TO EXCELLENCE

DATE: September 10, 2012

TO: Dr. Patrick Schott, Principal

SUBJECT: Forest Vista ES - IAQ - Air Test - Room 510

On 9/7, I received W.O. #132549: "Wall at the back of the room appears to have been damaged by water. The wall is soft to the touch and has a smell to it. South wall, right of the white board." This morning 9/10, I inspected the room and noticed the bubbling behind the wall board. I am putting in a P.O. to have that room Air Tested. Southwest GeoScience will be doing the testing this week, and we should have the results back by the end of the week. If you have any questions, please call me.

Thanks,
Paul
