Firefox - Manage Pop-up Blocker

To manage the pop-ups on Firefox, you may need to add sites to the exceptions. To do so,

1) With Firefox open, click “Tools” on the menu bar.

2) Click Options at the bottom of the menu.

3) Now click Content in the left menu.

4) The Pop-ups option should be checked, then the Exceptions button.

5) You can add the site address and click the Allow button to allow pop-ups from that site and Save the changes.

6) You will see the list of sites that have been set as exceptions in the window and can edit by removing one or all from the exception list.
Pop-up Blockers

**Note:** If you get a message for a **Pop-up blocker** – you must “Allow” for all programs you will access. If you get a popup window like the one of the examples shown here, click the “Allow pop-ups for lhub.lisd.local.

1) Type in your assigned username and password for that program in the Manage Password window.

2) From now on, your username and password for that program will be remembered and you will not have to enter it each time you log in.
